• Node.js
• Express.js
• MongoDB
• PostgresSQL
• Next.js
• Supabase

OTHER
• Git
• Github
• Vercel
• Figma

PROJECT

Home Service
Github   Website

• Next.js • PostgresSQL • Typescript • Tailwind • Supabase Auth •

Created a dynamic web platform to connect homeowners with reliable service providers. Key features include easy user sign-up, service listing management, address input for service location, review systems, and secure payment processing. Both homeowners and service providers have access to tailored dashboards, feature smooth interactions.

Buddy Blog
Github   Website

• Nuxt.js • PostgresSQL • Typescript • Tailwind • Supabase Auth •

Developed "Buddy Blog," a dynamic personal blog platform for seamless content creation and interaction. Key features include easy user sign-up, intuitive post creation, a comment system for engagement, and profile management. The platform ensures a smooth, user-friendly experience for both readers and content creators.
